- **Controls up to 4 printheads on 2 production lines**

BACKGROUND

The customer was using print and apply label applicators prior to installing the FoxJet system. The customer experienced maintenance issues with the applicators that caused production delays along with high label and ribbon costs. They needed a reliable system to print product identification including barcoding requirements.

FOXJET ADVANTAGE

FoxJet's ProSeries 768 printhead allows the flexibility needed for this customer's production line that has conveyor speeds up to 200 FPM and requires a 4" print area. The FoxJet system had a payback for the customer in 8.3 months!
